9. SMOKE DOORS, DETECTORS & ELECTRICAL FITTINGS

9.1. Smoke Doors and Detectors:

The Student Residences are protected from fire by smoke doors, smoke detectors and a fire alarm system. Smoke doors are fitted at the end and in the middle of each residential wing and will close automatically during power outage or if the fire alarm is triggered.

Smoke doors **MUST NOT** be obstructed or wedged open. Bedroom doors are fitted with self-closers and **MUST NOT** be detached at any time.

Smoke detectors are fitted in the corridor of each residential wing and in all rooms.

The local Fire Brigade will be notified through the monitored alarm system and will attend Longereng College.

Fire detectors in rooms are not connected to the alarm system. If one of these detectors is triggered it will sound an audible alarm until it is reset by the Residential Supervisor or the CFA. Please note that smoke detectors are sensitive and will be triggered by smoke from cigarettes, burnt food and naked flames etc.

Any student found to have triggered the fire alarm with a naked or exposed flame or similar, cigarette smoke or aerosol spray or by any other way will be charged all associated call out costs from Emergency Services. Minimum charge starts from \$650.00.

Any student found to have tampered with a smoke detector, alarm, fire extinguisher or CCTV cameras may be fined a minimum of \$500 plus expenses and/or disciplinary action.
